Kalmar Global aims to be a global leader in sustainable cargo flow and related services. As an essential part of that we strive for continuous improvement to promote sustainable, ethical and responsible ways of working.

Our Suppliers are an integral part of our supply chain. We choose them with care and on the basis of objective factors such as quality, sustainability, reliability, delivery and price. Furthermore, we expect from our Suppliers competence and continuous improvement in quality, sustainability, cost control and innovation.

The business practices and actions of our Suppliers may impact us and our reputation. We have adopted this Kalmar Supplier Code of Conduct (“the Code”) to ensure that all our suppliers and other third parties service providers know what is expected of them. We require everyone who conducts business with us to adhere to the legal and ethical standards and frameworks that we follow.

This Code outlines the minimum requirements for our Suppliers in addition to all relevant applicable laws and regulations. Moreover, we encourage our Suppliers to have ambitious goals that go beyond these requirements. We expect our Suppliers to use their best efforts to apply the same standards with their suppliers and subcontractors. Cooperation is needed to assess and avoid any adverse impacts on people, society and the environment and we and our business partners shall always mitigate or remediate such impacts should they occur.

Essentially, we are committed to full compliance with applicable laws and regulations and expect the same of our business partners. This Code as well as the Supplier Code of Conduct lay their foundation on international codes such as the United Nations (UN) Universal Declaration of Human Rights, the International Labor Organization (ILO) Declaration on Fundamental Principles and the Rights at Work and the UN Convention against Corruption.

We are a signatory member of the UN Global Compact and committed to the UN Guiding Principles on Business & Human Rights as well as the OECD Guidelines for Multinational Enterprises.

All Kalmar business partners must comply with this Code and must demonstrate compliance towards the standards of this Code either by committing themselves formally to this Code or by maintaining similar standards in their own code of conduct or company policies. We expect full compliance, data transparency and data accuracy from our business partners and we may conduct auditing activities in order to verify our business partners’ compliance with this Code.
